- Tec Pro, Ltd detailed work list and price quote
- Professional Services Agreement

Summary statement: The Waste Water Treatment Plant Improvements, Phase I project (insulated covers and blowers) is 98% complete. The only remaining items that need to be installed were not included in the original plans. Those items include electrical upgrades, SCADA hardware, and an alarm notification package. These items are critical for the system to function properly and for the blowers to communicate with the software controls. The additional work is detailed on the attached price quote from Tec Pro, Ltd. A Professional Services Agreement will be required.

Sole Source Justification: Over the past two years during construction of the Waste Water Treatment Plant Improvements, Phase I project, Tec Pro, Ltd has performed in excess of \$300,000 worth of industrial electrical and controls work on the project. Tec Pro, Ltd has the most intimate knowledge of the present system, how it functions, where all controls are located, how controls integrate with hardware, how it's programmed, and what is necessary for all component parts to communicate. Tec Pro, Ltd utilizes an open source controls programming protocol which is a requirement of the City, as opposed to a proprietary protocol.

Administration recommendation: Approve action memorandum 13-041.

Tom,

To memorialize the requests we have made for close out changes on this project please find the following information on the following (3) items;

1) Electrical Service / power distribution system changes.

Provide new 600 amp rated MDP in weatherproof outdoor enclosure mounted on building exterior. This is sized up for the service change as the design was not provided prior to our initial pricing. In the original plan was only a simple power connection to the existing feeder.

Provide new 400 amp feeder to the existing main service disconnect.

Provide additional grounding clean up as mentioned in CH2s design.

Relocate building transformer and low voltage panel to corner for proper working space as we discussed on site. (Slightly different layout than the design drawings)

Re-feed existing loads

Demo interior power gutter and electrical components.

Additional Cost \$22,079.50

2) Additional SCADA PC Hardware - dedicated PC for SCADA.

Originally we had the (1) SCADA PC for the project which out of necessity was applied as John's computer. With the desired ability for other and remote users to be able to access the Provide separate SCADA PC on the network to enable remote desktop in from any authorized network user, otherwise John's computer will need to run the application.

Additional Cost \$2,227.00

3) Additional SCADA alarm package.

Since the original proposal we have been working with a product that will allow us the ability to use varying means of media for alarming. Specifically we find that the text medium is very good for this use. Therefore this is a proposal to provide a full system alarm package for your new SCADA system that will include e-mail, text and other alarm notification medium. This is a software package, an IO server and labor to implement.

Additional Cost \$6,477.00

Thank your consideration of these changes in our scope of work.
